

Module: Introduction**Page: Introduction****0.1****Introduction**

Please give a general description and introduction to your organization

Kimco Realty Corporation is one of the nation's largest owners and operators of neighborhood and community shopping centers. The company is a self-administered real estate investment trust ("REIT") and has owned and operated neighborhood and community shopping centers for more than 50 years. As of December 31, 2010, Kimco had interests in 951 shopping center properties aggregating 138.0 million square feet of gross leasable area ("GLA") and 906 other property interests, primarily through the company's preferred equity investments, other real estate investments and non-retail properties, totaling approximately 34.4 million square feet of GLA, for a grand total of 1,857 properties aggregating 172.4 million square feet of GLA, located in 44 states, Puerto Rico, Canada, Mexico, Chile, Brazil and Peru. The company's ownership interests in real estate consist of its consolidated portfolio and in portfolios where the company owns an economic interest, such as properties in the company's investment real estate management programs, where the company partners with institutional investors and also retains management. The company believes its portfolio of neighborhood and community shopping center properties is the largest (measured by GLA) currently held by any publicly traded REIT.

0.2**Reporting Year**

Please state the start and end date of the year for which you are reporting data.

The current reporting year is the latest/most recent 12-month period for which data is reported. Enter the dates of this year first.

We request data for more than one reporting period for some emission accounting questions. Please provide data for the three years prior to the current reporting year if you have not provided this information before, or if this is the first time you have answered a CDP information request. (This does not apply if you have been offered and selected the option of answering the shorter questionnaire). If you are going to provide additional years of data, please give the dates of those reporting periods here. Work backwards from the most recent reporting year.

Please enter dates in following format: day(DD)/month(MM)/year(YYYY) (i.e. 31/01/2001).

Enter Periods that will be disclosed

Fri 01 Jan 2010 - Fri 31 Dec 2010

0.3

Country list configuration

Please select the countries for which you will be supplying data. This selection will be carried forward to assist you in completing your response

Select country

United States of America

0.4

Currency selection

Please select the currency in which you would like to submit your response. All financial information contained in the response should be in this currency.

0.5

Please select if you wish to complete a shorter information request

0.6

Modules

As part of the Investor CDP information request, electric utilities, companies with electric utility activities or assets, companies in the automobile or auto component manufacture sectors and companies in the oil and gas industry should complete supplementary questions in addition to the main questionnaire.

If you are in these sectors (according to the Global Industry Classification Standard (GICS)), the corresponding sector modules will be marked as default options to your information request. If you want to query your classification, please email respond@cdproject.net.

If you have not been presented with a sector module that you consider would be appropriate for your company to answer, please select the module below. If you wish to view the questions first, please see <https://www.cdproject.net/en-US/Programmes/Pages/More-questionnaires.aspx>.

Module: Management [Investor]

Page: 1. Governance

1.1

Where is the highest level of direct responsibility for climate change within your company?

Senior Manager/Officer

1.1a

Please identify the position of the individual or name of the committee with this responsibility

Barbara Pooley, Chief Administrative Officer

1.2

Do you provide incentives for the management of climate change issues, including the attainment of targets?

Yes

1.2a

Please complete the table

Who is entitled to benefit from these incentives?	The type of incentives	Incentivised performance indicator
Executive officer	Monetary reward	Monetary compensation is, in part, tied to the performance of Kimco's energy expense management and sustainability programs
Business unit managers	Monetary reward	Monetary compensation is, in part, tied to the performance of Kimco's energy expense management and sustainability programs
Environment/sustainability managers	Monetary reward	Monetary compensation is wholly tied to the performance of Kimco's energy expense management and sustainability programs

Page: 2. Strategy

2.1

Please select the option that best describes your risk management procedures with regard to climate change risks and opportunities

Integrated into multi-disciplinary company wide risk management processes

2.1a

Please provide further details (see guidance)

Risks from climate change are currently managed as a part of established governance processes within the company. Risk management within Kimco is a multi-stakeholder process that involves all of the key functional areas within the company. Ultimate accountability for corporate risk management resides with the senior executive team, with oversight from the Board of Directors.

Kimco's core business of acquiring, leasing, and managing properties is conducted at the regional level with central oversight from the corporate executive team. Management efforts pertaining to climate risks, including programs such as energy management and severe weather preparedness and response, are executed on an ongoing basis at the regional level with national oversight by Kimco's Vice President of Property Management and Director of Sustainability.

A key focus of Kimco's actions in this area is to generate long-term value for the organization by optimizing expenses, creating additional sources of income and enhancing our reputation among key stakeholder groups. At the individual property level, we focus on managing those risks and opportunities that have a direct impact on Net Operating Income (NOI). At the corporate level, our focus is on driving holistic programs that will help the company to meet its year-over-year financial goals and to protect or enhance our reputation.

In 2011, we will utilize CDP's framework of physical, regulatory, and other risks to complete an assessment of and recommendations for our climate management efforts.

2.2

Is climate change integrated into your business strategy?

Yes

2.2a

Please describe the process and outcomes (see guidance)

We view climate related strategy, in particular those actions taken to minimize expense and contribute to existing or additional sources of income, as directly influencing the Net Operating Income (NOI) of individual properties within our portfolio. As such, these actions are central to our overall business strategy.

Over the past several years, Kimco has taken significant steps to re-align resources to more effectively integrate climate change into our business strategy. The appointment of a national Vice President of Property Management, and the hiring of a full-time national Director of Sustainability, were actions taken in order to enhance our capability to develop processes and programs to execute company-wide initiatives like energy management. In addition – we have established a cross-functional team of leaders from across the organization that guides the development of our sustainability program.

In the short-term, our efforts are focused on establishing a high-quality set of building performance data with respect to energy use, carbon emissions, water use, and other related sustainability factors. In 2011, we will create and validate a historical database of energy and water consumption data from utility invoices. This effort, when paired with a new capability to generate real-time usage data via property sub-metering, will enable Kimco to establish and track universal performance metrics across our portfolio.

In 2011, Kimco will leverage this database of historical energy usage data to create a baseline inventory of Scope 1 and 2 greenhouse gas emissions for our U.S. properties. Once complete, our GHG inventory will serve as the basis for establishing emissions reductions targets and for validating the effectiveness of our program strategies.

In the longer-term, we are moving to implement a range of initiatives that will reduce our usage of energy, water, and other scarce resources. We have established a series of pilot programs that, once fully proven, will be rolled within our portfolio in order to optimize financial and environmental returns. Additional information on these programs is provided in our response to question 3.2.

In this, our first year of CDP reporting, numerous members of our executive team have become directly engaged in the development and oversight of our climate strategy. We anticipate that this will continue going forward.

2.2b

Please explain why not

2.3

Do you engage with policy makers to encourage further action on mitigation and/or adaptation?

Yes

2.3a

Please explain (i) the engagement process and (ii) actions you are advocating

We engage with policy makers on issues of relevance to our business, often through our involvement in industry groups such as the International Council of Shopping Centers (ICSC) and the National Association of Real Estate Investment Trusts (NAREIT). We believe that issues relating to climate change, including climate policy, energy policy, building standards, and others are common challenges for all companies within our industry. Industry associations are an effective means for communicating a cohesive and clear point-of-view to policy-makers on these topics.

Kimco's CEO, David Henry, was recently selected by the ICSC's Board of Trustees to serve as the association's chairman for 2011-2012. In addition, members of our Sustainability Program have recently engaged with environmental working groups within ICSC and NAREIT.

We are working to develop a formal policy position on climate change, and other related policies, and will engage in the policy process through venues that we deem most appropriate on issues of significance to Kimco's business interests.

3.1

Did you have an emissions reduction target that was active (ongoing or reached completion) in the reporting year?

No

3.1a

Please provide details of your absolute target

ID	Scope	% of emissions in scope	% reduction from base year	Base year	Base year emissions (metric tonnes CO2e)	Target year	Comment
----	-------	-------------------------	----------------------------	-----------	--	-------------	---------

3.1b

Please provide details of your intensity target

ID	Scope	% of emissions in scope	% reduction from base year	Metric	Base year	Base year emissions (metric tonnes CO2e)	Target year	Comment
----	-------	-------------------------	----------------------------	--------	-----------	--	-------------	---------

3.1c

Please also indicate what change in absolute emissions this intensity target reflects

ID	Direction of change anticipated in absolute Scope 1+2 emissions at target completion?	% change anticipated in absolute Scope 1+2 emissions	Direction of change anticipated in absolute Scope 3 emissions at target completion?	% change anticipated in absolute Scope 3 emissions	Comments
----	---	--	---	--	----------

3.1d

Please provide details on your progress against this target made in the reporting year

ID	% complete (time)	% complete (emissions)	Comment
----	-------------------	------------------------	---------

3.1e

Please explain (i) why not; and (ii) forecast how your emissions will change over the next five years

We are working to establish a baseline inventory of greenhouse gas emissions, and collect performance data on pilot emissions reduction programs, prior to establishing reduction goals. We expect to complete our emissions inventory in 2011, and will disclose the quantitative results of this effort during the 2012 reporting cycle.

At this stage, we do not have the necessary data to accurately forecast our emissions profile over the next five years. We anticipate that, once complete, our data collection efforts will enable better forecasting of emissions.

3.2

Does the use of your goods and/or services directly enable GHG emissions to be avoided by a third party?

Yes

3.2a

Please provide details (see guidance)

As one of the nation's largest retail landlords in the U.S., Kimco owns interests in community and neighborhood shopping centers with over 130 million square feet of leasable space. We provide retailers across the U.S., Canada, Mexico and select Latin American markets with leasable space in which to operate their brick-and-mortar retail operations.

Kimco recognizes that while our emissions footprint is significant, the emissions resulting from the operation of our tenant's retail operations is many times larger. The majority of these emissions are Scope 2, resulting from electricity purchased by individual tenants from local utility providers. As a landlord, the retail space that Kimco supplies has an influence on the greenhouse gas emissions resulting from tenant operations.

Kimco has an opportunity to partner with our tenants to reduce their emissions – through better alignment of economic incentives, sharing of best practices in energy management, the collection and dissemination of building performance data, and through better maintenance and upkeep of key energy-consuming assets like HVAC equipment.

We are working to expand these efforts, in addition to supplying innovative new service offerings such as on-site renewable energy to our tenants. Through our wholly-owned taxable REIT subsidiary, Center Sun LLC, Kimco provides tenants at 3 of our properties with cost-competitive renewable energy through power purchase agreements (PPAs).

3.3

Did you have emissions reduction initiatives that were active within the reporting year (this can include those in the planning and/or implementation phases)

Yes

3.3a

Please provide details in the table below

Activity type	Description of activity	Annual monetary savings (unit currency)	Investment required (unit currency)	Payback period
---------------	-------------------------	---	-------------------------------------	----------------

Activity type	Description of activity	Annual monetary savings (unit currency)	Investment required (unit currency)	Payback period
Energy efficiency: building fabric	Our cool roofing program incorporates reflective white-membrane materials as a part of our regular schedule of roof replacement projects, reducing heat gain and HVAC energy usage for tenants			
Energy efficiency: building services	Our building controls program focuses on providing centralized control of exterior lighting, irrigation, and other key systems – resulting in significant energy and water savings			
Low carbon energy installation	Through our wholly-owned subsidiary, Center Sun LLC, we provide on-site renewable energy to tenants			
Other	Through our centralized waste management program, Kimco is delivering tenants with a lower-cost trash disposal alternative and dramatically reducing vehicle miles driven by consolidating multiple trash management vendors for properties			

3.3b

What methods do you use to drive investment in emissions reduction activities?

Method	Comment
Dedicated budget for energy efficiency	We leverage our regular expense management and capital planning processes to drive investment in emissions reduction activities like energy efficiency and renewable energy

3.3c

If you do not have any emissions reduction initiatives, please explain why not

4.1

Have you published information about your company's response to climate change and GHG emissions performance for this reporting year in other places than in your CDP response? If so, please attach the publication(s)

Publication	Page/Section Reference	Identify the attachment
In voluntary communications (complete)	Sustainability/Corporate Responsibility Webpage	http://www.kimcorealty.com/

Further Information

As a part of the development of our Sustainability Program, we intend to expand and improve this content as a result of a planned 2011 website redesign project and other communication efforts. We are working to establish regular reporting of key sustainability information.

Module: Risks and Opportunities [Investor]

Page: 5. Climate Change Risks

5.1

Have you identified any climate change risks (current or future) that have potential to generate a substantive change in your business operations, revenue or expenditure? Tick all that apply

5.1a

Please describe your risks driven by changes in regulation

ID	Risk driver	Description	Potential impact	Timeframe	Direct/ Indirect	Likelihood	Magnitude of impact
----	-------------	-------------	------------------	-----------	------------------	------------	---------------------

5.1b

Please describe (i) the potential financial implications of the risk before taking action; (ii) the methods you are using to manage this risk; and (iii) the costs associated with these actions

5.1c

Please describe your risks that are driven by change in physical climate parameters

ID	Risk driver	Description	Potential impact	Timeframe	Direct/ Indirect	Likelihood	Magnitude of impact
----	-------------	-------------	------------------	-----------	------------------	------------	---------------------

5.1d

Please describe (i) the potential financial implications of the risk before taking action; (ii) the methods you are using to manage this risk; and (iii) the costs associated with these actions

5.1e

Please describe your risks that are driven by changes in other climate-related developments

ID	Risk driver	Description	Potential impact	Timeframe	Direct/ Indirect	Likelihood	Magnitude of impact
----	-------------	-------------	------------------	-----------	------------------	------------	---------------------

5.1f

Please describe (i) the potential financial implications of the risk before taking action; (ii) the methods you are using to manage this risk; (iii) the costs associated with these actions

5.1g

Please explain why you do not consider your company to be exposed to risks driven by changes in regulation that have the potential to generate a substantive change in your business operations, revenue or expenditure

Although we are aware of potential risks driven by changes in regulation, we have not as yet quantified the likelihood, impact, and time-horizon of these risks. As a result, we will not at the current time specify climate risks that have potential to generate a substantive change in our business operations, revenues or expenditures. Over the next year, we will undertake an analysis of climate risks and will provide additional detail in our 2012 CDP response. This analysis will include, but not be limited to: The potential of state, regional and federal legislation to impact energy prices; The potential of building code and other municipal requirements to increase the cost of developing and operating shopping centers; The potential of mandatory disclosure and reporting programs to increase expenses related to program management.

It should also be noted that while evaluating the impact of climate risks, Kimco continues to move forward proactively on a set of sustainability initiatives that will lessen potential impacts of regulatory risks to our business. For example, the steps we are taking to engage policy makers and to improve the energy efficiency of our portfolio will lessen the impact of regulatory risks. For more information, see our responses to questions 2.3 and 3.3.

5.1h

Please explain why you do not consider your company to be exposed to risks driven by physical climate parameters that have the potential to generate a substantive change in your business operations, revenue or expenditure

Although we are aware of potential risks driven by changes in physical climate parameters, we have not as yet quantified the likelihood, impact, and time-horizon of these risks. As a result, we will not at the current time specify climate risks that have potential to generate a substantive change in our business operations, revenues or expenditures.

Over the next year, we will undertake an analysis of climate risks and will provide additional detail in our 2012 CDP response. This analysis will include, but not be limited to: The potential of severe weather events, such as hurricanes and blizzards to damage assets and disrupt shopping center operations; The potential impact of sea level rise on shopping centers located in coastal regions.

It should also be noted that while evaluating the impact of climate risks, Kimco continues to move forward proactively on a set of sustainability initiatives that will lessen potential impacts of physical risks to our business. For example, the steps we are taking to implement national disaster response programs and procedures will lessen the impact of physical risks.

5.1i

Please explain why you do not consider your company to be exposed to risks driven by changes in other climate-related developments that have the potential to generate a substantive change in your business operations, revenue or expenditure

Although we are aware of potential risks driven by changes other climate-related developments, we have not as yet quantified the likelihood, impact, and time-horizon of these risks. As a result, we will not at the current time specify climate risks that have potential to generate a substantive change in our business operations, revenues or expenditures.

Over the next year, we will undertake an analysis of climate risks and will provide additional detail in our 2012 CDP response. This analysis will include the potential of a lack of transparency and responsiveness on climate issues to impact our reputation among key stakeholder groups, such as tenants and investors.

It should also be noted that while evaluating the impact of climate risks, Kimco continues to move forward proactively on a set of sustainability initiatives that will lessen potential impacts of other risks to our business. For example, the steps we are taking to improve transparency through venues like the Carbon Disclosure Project will lessen the impact of other risks.

Page: 6. Climate Change Opportunities

6.1

Have you identified any climate change opportunities (current or future) that have the potential to generate a substantive change in your business operations, revenue or expenditure? Tick all that apply

6.1a

Please describe your opportunities that are driven by changes in regulation

ID	Opportunity driver	Description	Potential impact	Timeframe	Direct/Indirect	Likelihood	Magnitude of impact
----	--------------------	-------------	------------------	-----------	-----------------	------------	---------------------

6.1b

Please describe (i) the potential financial implications of the opportunity; (ii) the methods you are using to manage this opportunity; (iii) the costs associated with these actions

6.1c

Please describe the opportunities that are driven by changes in physical climate parameters

ID	Opportunity driver	Description	Potential impact	Timeframe	Direct/Indirect	Likelihood	Magnitude of impact
----	--------------------	-------------	------------------	-----------	-----------------	------------	---------------------

6.1d

Please describe (i) the potential financial implications of the opportunity; (ii) the methods you are using to manage this opportunity; (iii) the costs associated with these actions

6.1e

Please describe the opportunities that are driven by changes in other climate-related developments

ID	Opportunity driver	Description	Potential impact	Timeframe	Direct/ Indirect	Likelihood	Magnitude of impact
----	--------------------	-------------	------------------	-----------	------------------	------------	---------------------

6.1f

Please describe (i) the potential financial implications of the opportunity; (ii) the methods you are using to manage this opportunity; (iii) the costs associated with these actions

6.1g

Please explain why you do not consider your company to be exposed to opportunities driven by changes in regulation that have the potential to generate a substantive change in your business operations, revenue or expenditure

Although we are aware of potential opportunities driven by changes in regulation, we have not as yet quantified the likelihood, impact, and time-horizon of these opportunities. As a result, we will not at the current time specify climate opportunities that have potential to generate a substantive change in our business operations, revenues or expenditures.

Over the next year, we will undertake an analysis of climate opportunities and will provide additional detail in our 2012 CDP response. This analysis will include, but not be limited to: The potential of government incentives to dramatically improve the speed and magnitude of returns on investments in energy efficiency and renewable energy technologies; The potential of future regulatory schemes to allow companies like Kimco to monetize carbon reductions via the origination and sale of tradable commodities such as carbon offsets, RECs, white tags, etc.

It should also be noted that while evaluating the impact of climate opportunities, Kimco continues to move forward proactively on a set of sustainability initiatives that should improve our ability to leverage regulatory opportunities that will benefit our business. For example, the steps we are taking to engage policy makers and pursue incentives for eligible energy investments will ensure that we benefit from regulatory opportunities.

6.1h

Please explain why you do not consider your company to be exposed to opportunities driven by physical climate parameters that have the potential to generate a substantive change in your business operations, revenue or expenditure

We are not aware of physical opportunities relating to climate change.

6.1i

Please explain why you do not consider your company to be exposed to opportunities driven by changes in other climate-related developments that have the potential to generate a substantive change in your business operations, revenue or expenditure

Although we are aware of potential opportunities driven by changes other climate-related developments, we have not as yet quantified the likelihood, impact, and time-horizon of these opportunities. As a result, we will not at the current time specify climate opportunities that have potential to generate a substantive change in our business operations, revenues or expenditures.

Over the next year, we will undertake an analysis of climate opportunities and will provide additional detail in our 2012 CDP response. This analysis will include, but not be limited to: The potential of our sustainability efforts to increase tenant loyalty and improve the overall value of the assets in our portfolio; The potential for new service offerings relating to our ability to provide tenants with solutions to help them improve energy efficiency, source renewable energy, etc.

It should also be noted that while evaluating the impact of climate opportunities, Kimco continues to move forward proactively on a set of sustainability initiatives that should improve our ability to leverage other opportunities that will benefit our business. For example, the steps we are taking to engage tenants through the supply of on-site solar power will ensure that we benefit from other opportunities.

14.1

Do you participate in any emission trading schemes?

No, and we do not currently anticipate doing so in the next two years

14.1a

Please complete the following table for each of the emission trading schemes in which you participate

Scheme name	Period for which data is supplied	Allowances allocated	Allowances purchased	Verified emissions in metric tonnes CO2e	Details of ownership
-------------	-----------------------------------	----------------------	----------------------	--	----------------------

14.1b

What is your strategy for complying with the schemes in which you participate or anticipate participating?

14.2

Has your company originated any project-based carbon credits or purchased any within the reporting period?

No

14.2a

Please complete the following table

Credit origination or credit purchase	Project type	Project identification	Verified to which standard	Number of credits (metric tonnes of CO2e)	Number of credits (metric tonnes CO2e): Risk adjusted volume	Credits retired	Purpose e.g. compliance
---------------------------------------	--------------	------------------------	----------------------------	---	--	-----------------	-------------------------

15.1

Please provide data on sources of Scope 3 emissions that are relevant to your organization

Sources of Scope 3 emissions	metric tonnes CO2e	Methodology	If you cannot provide a figure for emissions, please describe them
------------------------------	--------------------	-------------	--

15.2

Please indicate the verification/assurance status that applies to your Scope 3 emissions

15.2a

Please indicate the proportion of your Scope 3 emissions that are verified/assured

15.2b

Please provide further details of the verification/assurance undertaken, and attach the relevant statements

Type of verification or assurance	Relevant standard	Relevant statement attached
-----------------------------------	-------------------	-----------------------------

15.3

How do your absolute Scope 3 emissions for the reporting year compare to the previous year?

15.3a

Please complete the table

Reason	Emissions value (percentage)	Direction of Change	Comment
--------	------------------------------	---------------------	---------
